

Five reasons

Vantiv iQ for PayFac is the smart path to payment data and reporting

USER-FRIENDLY INTERFACE

EASY ACCESS TO WELL ORGANIZED AND HIGHLY GRANULAR DATA

POWERFUL SEARCH CAPABILITIES

ADMINISTRATIVE CONTROL

VANTIV SCHEDULED SECURE REPORTS (SSR)

1 User-friendly interface

- Customizable control interface to enable convenient and secure access to your business data
- Little or no training need to use the interface
- Easily trace transaction through all phases of their life-cycle
- Developed with years of customer feedback ensuring the user-friendly experience

2 Easy access to well organized and highly granular data

- Example: Net Settled Sales (NSS) by Transaction Report provides detailed insights into individual settled transactions. We have demonstrated the ability to download one-million transactions in less than 2 minutes.
- Provides the ability to show and describe the funding structure with granularity

3 Powerful search capabilities

- Reconciliation Report, by Settlement Data answers net settlement questions like; How much money was settled? How much money went to the merchant?
- Provides access to chargeback and dispute data including card user chargeback history as well as historical win percentage

4 Administrative control

- Control administrative functions such as user set-up and profile settings
- Track users as well as manage IP access

5 Vantiv Scheduled Secure Reports (SSR)

- Data available to crunch numbers your way
- Design and create predefined reports
 - Security – reports are delivered through secure FTP
 - Flexibility – reports are accessible in your secure FTP directory for up to thirty days.
 - Accuracy – scheduled reports are consistent with reports available in Vantiv iQ.
